DETAILED ACTION

1. Claims 1-17,19-33 were examined.

Section I: Final Rejection

Claim Objection

2. Claims 2,19 and 33 are objected to by use of the term "about 0.1 cm⁻¹" since it's not defined in the specification and it's being interpreted broadly and not consistent with specification.

Specification

3. The specification is objected to as not using the word "medium". It is given its ordinary and customary definition in the art to include carrier waves.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 17 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claim 20 recites the limitation "the exact expansion" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 101

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 2121

8. Claims 1-17,19-33 are directed to computing atomic molecular level species spectral transmittances. This claimed subject matter lacks a practical application of a judicial exception (law of nature, abstract idea, naturally occurring article/phenomenon) since it fails to produce a useful, concrete and tangible result.

Specifically, the claimed subject matter does not produce a **useful result** because the claimed subject matter fails to sufficiently reflect at least one practical utility set forth in the descriptive portion of the specification. More specifically, while the described practical utility is directed to computing atomic molecular level species spectral transmittances the claimed subject matter relates ONLY calculating transmittance values which is nothing more than to data manipulation.

9. Claims 1-17,19-33 are rejected under 35 U.S.C. 101 because these claims are abstract per se since the claims are to a carrier wave.

Double Patenting

10. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29

USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

11. Claim 1 provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 18 of copending Application No. 11/398,696. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both disclose species of band model data.

12. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Section II: Response to Arguments

112

13. Applicants are thanked for addressing this issue. While most of the claims pertaining to this rejection were amended, some remain outstanding as set forth above.

Art Unit: 2121

With regard to claims 2, 19 and 33, the limitation "about 0.1 cm⁻¹" the rejection is withdrawn.

Double Patenting

14. Applicants have acknowledged the issue but have not rectified it at this time, thus the rejection is maintained.

101

12. Applicants are thanked for addressing this issue; however, as stated in the previous office action, the claims fail to denote a specific credible application. Amending the claims to a computer-readable medium does not obviate the rejection since its definition is silent within the disclosure (applicants' own admission; applicants' response, page 8, 3rd paragraph) and silent to any specific credible utility.

Conclusion

Applicants' amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2121

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
